Summary

Highly motivated, self-taught front end developer.

I create fun, innovative, accessible and functional interfaces for mobile-first, dynamic web applications utilising HTML5, CSS3, JavaScript, Bootstrap, Materialize css React, Firebase. I am very comfortable using RESTful api. I write code that adheres to standard and best practices.

My favorite part of being a web developer is the ongoing opportunities to learn and grow hence, I am always on the look out for opportunity to continually learn and contribute my quota to solving tech related challenges.
